 About enabling multi-factor auth

Please read the deployment guide if you haven't already.

If your users do not regularly sign in through the browser, you can send them to this link to register for multi-factor auth: <https://aka.ms/MFASetup>

Microsoft vishnutandu04_gmail.com#EXT#@vishnutandu04gmail.onmicrosoft.com ?

multi-factor authentication

users service settings

app passwords

☒ Allow users to create app passwords to sign in to non-browser apps
☐ Do not allow users to create app passwords to sign in to non-browser apps

verification options

Methods available to users:

- ☐ Call to phone
- ☒ Text message to phone
- ☒ Notification through mobile app
- ☒ Verification code from mobile app or hardware token

remember multi-factor authentication on trusted device

☒ Allow users to remember multi-factor authentication on devices they trust (between one to 365 days)
Number of days users can trust devices for

NOTE: For the optimal user experience, we recommend using Conditional Access sign-in frequency to extend session lifetimes on trusted devices, locations, or low-risk sessions as an alternative to 'Remember MFA on a trusted device' settings. If using 'Remember MFA on a trusted device,' be sure to extend the duration to 90 or more days.
